## University portal & web content management system

ats university portal and web content management solution in higher education provides single sign-on access to everything from academic information to social networking for prospective students, current students, faculty and staff, student organizations, university administration, and alumni, and is the “one-stop-shop” for everything related to your university experience

ats Portal allows web managers and editors across the University's schools, colleges and departments to concentrate on content rather than design - freeing them from the distraction of coding and layouts and allowing them to focus on the audience for whom they are writing and providing this audience with the most relevant and up-to-date information.

ats Portal provides constituents with personalized, role-based, single sign-on access to campus information and services. The portal allows institutions to target content to constituents' specific interests and needs, and to consolidate information and services from an array of sources.

Based on the Oracle Webcenter Suite—but tailored to the specific needs of ats e-register—The ats Portal integrates fully with e-register Students Information System(SIS).

The ATS Portal helps an institution unify its digital campus and exceed student expectations. ats Portal can make measurable improvements in performance. Teachers will focus more on educating, students will focus more on preparing for their futures, and administrators will focus more on projects that improve student service.

- ePortfolio

## Benefits

**Prospective Students** can connect to their new classmates and kick-start their university experience.

**Students** utilize our single sign-on access to track automatically updated information relating to their personalized university experience.

**Student Activity Group** Leaders can post information on automatically generated web pages to communicate directly with their members.

**Alumni** can stay in better contact by learning about fellow graduates, alumni events and how to donate to their institutions.

**Faculty** Members use the portal to alert their students of important upcoming schedule changes, if they are running late or going to miss class or office hours, and more!

**Administrator** can send university-wide broadcast messages, create subcommittees and forums.
